Data-Driven

| The Context & Vision

The Founder's Journey

Firoz grew up amidst the bustling, aromatic street food stalls of Mohammad Ali Road, Mumbai.

He witnessed the deep Indian love for food and saw an opportunity to merge this passion with the convenience of modern technology.

Lean Startup Roots

Launched in 2024 with a hyper-local focus, avoiding heavy franchise overhead.

Gig Economy Model

Freelance runners & WhatsApp orders for maximum agility and low cost.

The Vision

To build a scalable, data-driven food delivery enterprise.

100th order milestone

| Conclusion & Path Forward

Key Takeaways

1

Data is Critical for Scaling

Excel limitations hinder growth; systematic data management is essential for operational efficiency

2

Lean Model Works

WhatsApp ordering & gig delivery model reduces overhead while maintaining quality service

3

Indian Fusion Strategy

Combining traditional flavors with modern delivery meets local market demands effectively

Roadmap to Growth

Clean & Structure Data

Migrate from Excel to SQL, normalize datasets

Phase 1

Extract Business Insights

Analyze delivery efficiency, customer preferences

Phase 2

Optimize & Scale

Implement data-driven improvements, expand operations

Phase 3

| Your Mission

01

Clean & Prepare Data

Transform raw Excel data into analysis-ready format. Handle exclusions, extras, and cancellation fields properly.

Data Cleaning

Normalization

Type Casting

02

Analyze Operations

Calculate runner performance, delivery success rates, average wait times, and delivery speeds.

Aggregations

Window Functions

Metrics

03

Optimize Ingredients

Identify most popular extras and exclusions. Analyze ingredient usage patterns to reduce waste.

Pattern Analysis

Inventory

Customization

04

Deliver Insights

Create actionable recommendations for Firoz to improve efficiency, reduce costs, and scale operations.
